

# Before Installing JPF

- Windows users
  - Install cygwin from <http://cygwin.com>
    - Don't forget to include bash and diffutils
  - Install JDK 1.6 (java + javac)
- Mac OS X users and Linux users
  - Install diffutils
  - (Probably, JDK 1.6 has already been installed)

# Install Java PathFinder

- Download binary from
  - <http://sourceforge.net/projects/javapathfinder/>
  - or
  - <http://sourceforge.net/projects/javapathfinder/files/jpf-bin/r1258/jpf-bin-r1258.zip/download>
- Run the following program under JPF
  - HelloWorld.java
- Send inquiries to
  - Cyrille Artho <c.artho@aist.go.jp>
